

Enclosed please find a list of our new publications. You are invited to visit our web site at www.neaman.org.il , download and read the recent publications of the Samuel Neaman Institute.

New Publications

[Evaluation of the Space Industry's Impact on the Israeli Economy](#)

The project's goal is to map the interconnections between Israel's academy, its national defense system and the industry in light of the country's growth and position in space industry and in space technology.

[Electric and Hybrid Vehicles - Summary and recommendation of the 14th assembly of the Energy Forum at SNI](#)

The development of non-fossil fuel vehicles is addressed by scientists and engineers all over the world. The global effort is to reduce air pollution, especially in the dense cities. The Israeli government declared in Nov 2007 the encouragement of non-fossil fueled vehicles.

[Solar power plants in Israel - Summary and recommendation of the 13th assembly of the energy forum at SNI](#)

The forum discussed advantages and barriers for the implementation of such technologies in Israel, and the measures needed to encourage their application.

[Evaluation of Israel R&D Plan - "Magneton" - Summary report](#)

The purpose of the evaluation is to analyze the program's effectiveness as a tool for encouraging technology transfer from academia to industry by dual cooperation between a single academic research team and an industrial company.

[VC Policy: Moving from a Financial Perspective towards a Systemic and Evolutionary Framework \(STE-WP-42\)](#)

Many VC policies in Europe up to and including the 1990s took a 'static' financial view of VC that focused on bridging financial gaps rather than creating of a new mechanism to assure the emergence of higher forms of organization, such as a cluster or a market. Following the weak impact of some of these policies, we propose that a new systemic and evolutionary framework can be useful for both real world ('positive') analysis and policy ('normative') analysis.
